Many different bodies are available from several different manufacturers. The above example is only meant for you to get an idea of the parts required to build a complete car. See our website ([www.srbymichael.com](http://www.srbymichael.com)) for body options.

This is an estimate of the parts required to build a car. Labor to build your car is an additional charge. Each car is different and labor costs will vary depending on options selected. All parts prices are subject to invoice price as delivered. Street Rods by Michael, Inc. can build a car to any stage of completion. Please call us for an estimate.

Thank you for giving us the opportunity to serve you.
