**32 Master Cylinder Mount and Pedal Kit**

Application for a dual reservoir master cylinder and power booster assembly.

**Note:** The dimension indicated in drawing 13 is to measure from the center of front crossmember back to locate the position of the center of the pivot tube (40 3/4") of the master cylinder bracket. When positioning, be sure the pedal does not interfere with any other components!

Position bracket 1" down.

Weld bracket 1" down from top of frame to allow for booster clearance from floor.

1" down from top of frame rail.

---

Centerline of the master cylinder.

Center of crossmember.

40 3/4"
